Redcliff Wins Double Header in Ball League

Diamonds Now at Top of The Baseball League

Redcliff Dominions won both games in the baseball league double header fixture here last Sunday with the Medaltas.

In the afternoon game they defeated the Medaltas by a score of 4 to 1.

The midday game was a close and snappy one all the way through. In the early innings the Medaltas took the lead with one run which they held till the last half of the eighth, when Err came to bat with only one base, and knocked out a home run. This gave the Diamonds the lead of 1 run which they held till the finish. It was a fine game throughout.

The evening game was easy pickings for Redcliff. They beat the Medaltas by a score of 4 to 1. The only run made by the Medaltas was made on a single but the latter completed the circuit by wild throwing from base to base.

The winning of these two games puts the Dominions at the top of the league again.

The standing now is—

	W	L	Pct.
Redcliff	4	2	66
Medaltas	3	3	50
Tigers	1	3	25

There was an appalling list of fatal accidents throughout Alberta last week.

Misses Margaret Cann and Muriel Hitchen are at present visiting in Medicine Hat, the guests of Margaret's grandmother, Mrs. Bassett.

Crop conditions in the prairie provinces and in wheat sections in U.S. caused a record jump of 5 cents a bushel in wheat in Winnipeg on Monday.

There was a big rush for electric cars last weekend when there was an all-round reduction of 40% based on the original price of Jan. 1st.

Lionel Cameron McCollum, of Suffield, died in McElin's hospital on July 3rd last. Deceased was 29 years of age and had been a resident of Suffield for a number of years.

EDMONTON EXHIBITION

Govt. to Assist in Water Conservation

For Farmers To Provide Water For Their Stock

Under the impetus of the extension in western Canada, the Dominion government has decided to expand its drought-rehabilitation work in the west.

Hon. J. G. Gardiner, minister of agriculture, said financial assistance would be given farmers for the purchase of "dugouts" or reservoirs of water for stock.

The basis of assistance to farmers is three cents per cubic yard of dirt moved up to a maximum of \$40. In all cases the government provides engineering advice and all assisted projects must be approved by engineers.

Assistance on the same basis is provided for the construction of small dams.

Board to Investigate Unemployed Veterans

New Members Chosen For the Pensions Commission

Hon. C. G. Power, minister of pensions, announced several appointments relating to war veterans.

The following are appointed to the pension commission: Brigadier General H. F. McDonald, Ottawa, chairman; C. J. Keilly, Ottawa; Dr. R. J. Keilly, Ottawa; and C. W. Peck, Vancouver.

The following are appointed to the Veterans' Assistance Commission: Col. J. G. Rattay, Ottawa, as chairman; Brig. Gen. Alex Ross, Yorkton, Sask.; Lieut. Col. H. L. De Martigny, Montreal; and H. M. Sinclair, Dunrobin, Ont., as secretary.

As chairman of the Pension Commission, General McDonald will succeed Judge Taylor.

The Veterans' Assistance Commission will be a new board created at the last session of parliament. The main duty will be to investigate the extent of unemployment among returned soldiers.

What looked promising for a nice rain storm last Tuesday passed over with scanty enough rain to lay the dust.

Mrs. A. N. Collard and family are at present at their summer cottage at Elkwater Lake where they will spend their holidays.

Miss Maude Wyatt who has been teaching near How Island, is spending her holidays here with her parents, Mr. and Mrs. J. W. Wyatt.

Mrs. H. E. Sheehy and her children left on Friday for Popoli River, B. C. where they will spend the holidays visiting Mrs. Sheehy's sister, Mrs. D. Smith.

Crops in Southwestern Saskatchewan are now reduced to a total loss owing to scorching winds and continued dry weather. Conditions are much the same here.

TOWN OF REDCLIFF

The Local Tax Arrears Consolidation Act

The Council of the Town of Redcliff has passed a By-law declaring that the above Act will be applicable to the Town of Redcliff and said By-law has been approved by the Minister of Municipal Affairs in writing. All consolidated arrears of taxes shall under this Act be payable by five equal annual instalments together with the current taxes on or before the 15th day of December except as hereinafter mentioned. The following persons may make application to the Council to come under the provisions of the above Act.

Any person, firm or corporation who is the owner of any parcel of land in the Town of Redcliff, against the title of which, there is a subsisting notification for arrears under "The Tax Recovery Act 1929."

Any person who has been a bona fide resident of the Town of Redcliff for 12 months immediately preceding the date of his application, in the case of lands which have been finally acquired by the town of Redcliff but not sold, or such persons personal representative.

In such cases where the applicant's property is to be exposed for sale at the forthcoming Tax Sale on August 22nd, 1936, such applicants should make their applications in time for the Council to consider same previous to that date.

Upon receipt of the application, the Secretary Treasurer shall calculate the amount required to pay the arrears of taxes, if the same were consolidated, and the applicant shall deposit with the Secretary Treasurer one fifth of such sum.

In such cases where the application to consolidate is made after the 15th day of November 1936, the applicant shall also deposit with the Secretary Treasurer sufficient to pay the current year's taxes.

In any event the current year's taxes shall be paid by the applicant on or before the 15th day of December.

In case the application is not granted, provision is made in said Act for an appeal to the Minister of Municipal Affairs.

The Council may, on the applications in writing of any person liable under a consolidated agreement under this Act and with the approval of the Minister, by resolution, extend that agreement for one year and waive payment of the instalment payable under the agreement for any one year of the years for which agreement is made, in case it is thought proper so to do by reason of crop failure or other circumstances.

No buildings, fences, fixtures or other improvements shall be removed from any land in respect to which there is a subsisting tax consolidation agreement.

To those who properly come under the provisions of the above Act, all proceedings under the Tax Recovery Act 1929 are suspended in respect to the properties involved while such consolidation agreement is in force.

Crop Conditions Are Now Very Serious

Shortage of Feed is Now Anticipated Here

During the past two weeks, all dry land crops in the southern and east central areas have suffered a serious set-back at a critical period because of prevailing hot weather and high winds, no rains having occurred to relieve these distressed conditions. This is especially true of the territory from Medicine Hat north-west to Brooks and continuing north to the Youngstown district, where hopes for even a fair crop are practically abandoned. In the more seriously affected districts, a shortage of feed is already anticipated. The whole of the south and east is badly in need of moisture. This applies particularly to stubbled-in crops, pasture and range lands.

Short Grass Asso. Appointing Directors

H. W. Keay Chosen For North Half of Tilley Area

Members of the recently organized Short Grass Stock Growers' Association are continuing to meet in the various towns and appoint permanent directors, all of whom must be named before organization is complete.

At a meeting held in Jenness recently, H. W. Keay was appointed permanent director of one half embracing the north half of the Tilley Area.

Membership in this organization is growing and stockmen are taking an active interest in it. "Present conditions warrant some changes by the government in rental and tax rates in this district" an official said.

Mr. Preston Martin, of Clareholm, and formerly of Redcliff, is at present acting as assistant at the C. P. R. station here.

Lorne Thomson who on many occasions has figured in the stampede here, won the first prize for wild steer riding, in Calgary yesterday. He is a resident of this district.

A few weeks ago a number of girls representing the Girl Guides in Medicine Hat came to Redcliff selling tickets to raise funds to send the girls to summer camp. One woman, in charge of the girls informed us that the Hat Boy Scouts had advised the girls to come here and assured them they would be well received and that the boys themselves on several occasions had received liberal support in Redcliff.

We were pleased to hear this. A week or so later a number of Boy Scouts from Redcliff came to Medicine to sell a similar kind of tickets from which they were to get a commission to be used for a similar purpose. The Redcliff boys spent an afternoon in the Hat and sold only two tickets.

It seems passing strange that the same courtesy was not extended to our Scouts as has been received on several occasions by those of our neighbors in Medicine Hat.

Legion Holds Annual Picnic For Children

Good Program Arranged For The Afternoon

Members of the local Legion with their wives and families were entertained to their annual picnic at Central Park, Medicine Hat, yesterday afternoon. A number of well filled cars left the Legion Building sharply at one o'clock and on arrival at the Park a lengthy program of games and races was successfully carried out. Ice cream, soft drinks and candies were liberally passed around among the children and in the evening all joined together for their picnic supper.

The weather was ideal for the occasion and the afternoon outing was thoroughly enjoyed by both children and grownups.

More Trouble is Feared in Ethiopia

Wet Weather Season is in Favor of Ethiopians

Latest reports from Ethiopia would indicate that the war is not yet over and that the prospects are that the worst is yet to come.

Under cover of the big annual rains which are now in sight it is feared an Ethiopian guerrilla campaign will commence shortly. Many armed bands, led by young Ethiopians educated in Europe, are secretly massing around Addis Ababa and report states that already many Italian soldiers and officers have been attacked and annihilated in ambush.

Quite a number from town and district are attending the Stampede in Calgary this week.

Churches

ST. MARY'S CHURCH

Mass will be celebrated on the 3rd Sunday of each month at 8:30 a.m.

ST. AMBROSE CHURCH

Rev. H. S. Hammett, Vicar
5th Sunday after Trinity
July 12th, 1936.
8 a.m. Holy Communion.
10:00 a.m. Sunday School
11:00 a.m. No Service
7:30 p.m. Evening Song
Terra Nova
11:00 a.m. Holy Communion

GORDON MEMORIAL UNITED CHURCH

Rev. H. V. Ellison, Pastor
Sunday, July 12th, 1936.
10 a.m. Church School.
11:15 a.m. Morning Worship
Subject: "Jesus and the Prodigal Son." The Lion who remembered."
3 p.m. Service at Bowell.
7:30 p.m. Evening Worship
Subject: "A Great Deliverer." Members of Unity L. O. L. "Medicine Hat" will attend in a body.
Special music by the Choir.
Soloist, Mr. A. Baker, Medicine Hat.

New Pastor Inducted Into Gordon Memorial

Rev. R. Binning and W. Cann Conduct Ceremony

Rev. H. V. Ellison, the newly appointed pastor for Gordon Memorial Church, was inducted into this charge last Thursday evening.

Rev. R. Binning, chairman of the Presbytery, preached the sermon to the people, after which he performed the ceremony of induction.

In his address Mr. Binning said this was a great day of challenge to the Christian Church. It is a day when people have misplaced ideas of values and we should remember that Jesus placed emphasis upon the supreme value of personality. He stressed the need of co-operation and loyalty in the work of the church, more especially at this time when a new minister is taking charge.

Rev. W. Cann's address was to the minister. While the minister was human, he had a great privilege to preach the Gospel of hope and comfort, said he speaker. He may meet difference and opposition as Christ, but as a servant of Christ he should follow His example.

After the service, there was a social hour in which Mr. and Mrs. Ellison met a number of members of the congregation.

Perce Park Dedicated At Waterton Lake

Ceremony Included Messages From U.S. and Canada

A new weekend registration record was set at the picturesque mountain playground at Waterton Lake when over 6,000 people arrived in nearly 2,000 cars, a third of which bore United States registry. Official dedication of the Canadian park as a part of Waterton-Glacier International Peace Park and other ceremonies proved the growing card which set the new attendance record.

Bonds of international peace were forged more strongly than ever before in the dedication of the Canadian side of Waterton-Glacier International Peace Park in a colorful ceremony in front of the gaily decorated Prince of Wales Hotel on Saturday afternoon. The program was in charge of Canon S. H. Middleton, acting as general chairman, while representatives of the King, the governments of United States and Canada, the clergy and others took part.

Prayers for min. to save the crops were offered up in several churches and by Premier Aberhart last Sunday.

Rev. and Mrs. J. S. Parks and child of Empress, paid a visit to Rev. and Mrs. Hammett last week.

According to a statement from Dr. Robinson, M. I. A. work will commence next week on the Hilda-Schuler road and 10 employees will receive certificates in property certificates about the 1st of August.

Only War Could Stop Italy In Ethiopia Says Premier Baldwin

Edinburgh, Scotland. — War alone could stop Italy from achieving its desired ends in Ethiopia, Prime Minister Stanley Baldwin warned in a speech here, defending his government's attitude toward sanctions.

Sanctions were primarily designed to prevent war, he asserted, declaring: "Collective security will never work unless the nations who take part in it are prepared simultaneously to threaten with military sanctions, and, if necessary, to fight."

The prime minister, who spoke to a mass meeting of Conservatives, continued:

"Whatever the perils of the future may be, and whatever the ambitions locked in the breasts of dictators, they know as well as we do that no other way is open to them but to fight."

Stressing the inevitability of war, he said: "I do not believe in 'realistic' policy, as it is called, adopted, Mr. Baldwin said he did not know a single country in Europe prepared for that."

Expressing hope some measure of disarmament may yet be achieved, he said: "We must see that if we have to fight again our people have the best that there is to fight with, both in quality and quantity, and that no risks are taken beyond risks which might fairly be assumed by a gallant fighting nation."

"I have nothing to apologize for," he said in reference to his government's attitude on the sanctions question. "We think it right to drop them because we do not believe their continuance, even if all nations desire it, could serve any useful or effective purpose."

"Sanctions are put on for stopping war. They were not devised for purely punitive purposes. In my view, there is only one way of stopping the course of events as they have so far taken place and that is to go to war."

The forthcoming meetings of the League of Nations council and assembly will end Great Britain's campaign to stop Italy from conquering Ethiopia, he said.

Baldwin indirectly scored the opposition forces which continue to urge maintenance, and possible extension of sanctions. "Let us not allow the course of events as they have so far taken place and that is to go to war."

The League of Nations council and assembly will end Great Britain's campaign to stop Italy from conquering Ethiopia, he said.

Royal Commission To Probe Abuses In Quebec Province

Quebec.—A royal commission will conduct a complete inquiry into the previous administration of Quebec province, Premier Adolphe Godbout said in his first address as prime minister.

The commission will be "absolutely independent of the government," he declared, and people "whom the inquiry revealed as being responsible for any abuses would be punished regardless of their position and status."

Such recommendation as might be made by the commission following the inquiry would be followed by the letter by the new government, the premier said, adding he would introduce new government "in a few days."

The only instructions the commission would receive would be to bring to light all that had been done by the Quebec administration, regardless of whether these revelations affect or involve persons attached to the Liberal party.

The premier promised his government would implement reforms which would assure farmers "an honest return for their toil," assure the working man a "reasonable salary" and "restore the economic equilibrium of the province."

The new government felt rich and

powerful.

"I have any control in the government," he said.

Coming to the defence of Anthony Brien, Baldwin described the foreign secretary as a "man of great ideal and courage."

Eden threw over nothing, he said.

The government had called upon the British public to support sanctions, he admitted, but predicted it would endorse their subsequent change of policy.

Lower Interest Rates

Frederick Bracken Says Government Fledged To Effects To This End

Winnipeg.—Premier John Bracken's Manitoba government is pledged to every "reasonable effort" in bringing about lower interest rates on borrowings by the province, municipalities and individuals.

In his first public statement since his appointment that provincial elections will hold July 27, Mr. Bracken declared lower interest rates would be sought but he emphasized no threat of direct repudiation or arbitrary action was implied.

In an address to the Manitoba Municipal Secretary-treasurers' Association, he said: "The Liberal-Progressive party would present to the electors next month."

He outlined a six-fold unemployment relief policy, calling upon the Dominion to assume a larger share of the cost of public services and referred to problems of agricultural, municipal and drought relief.

Big Oil Gusher

Deepest Producing Well In British Empire In Turner Valley

Calgary.—With a roar that could be heard for several miles, a new oil well in the Turner Valley, Alberta, declared to be the deepest producing well in the British Empire, came into production recently.

Following the crash of a column of mud and water from the depths more than 4,000 feet below the surface, crude oil flowed out in heavy volume. The well is 8,824 feet deep.

Clarence E. Snyder, engineer, estimated the flow ran from 700 to 1,500 barrels daily. A flow-control device was installed immediately.

Library Book Returned

London.—A Vancouver man returned a public library book by mail with a note explaining he had seven years and was impelled by "absolute honesty" to return it.

Library officials have said, pointing out the fine of two cents a day for overdue books, now amounts to \$50.

The coming election campaign will be a three-party fight.

Paul Gouin, leader of the insurgent group, L'Action Libérale Nationale, announced his party would enter the campaign free from the agreement it made with the Conservative party in the election of last November when they united for the express purpose of defeating the Liberal regime of Louis A. Taschereau, in power for the last 16 years.

Repudiation of the agreement between the two parties had been brought about by a "series of acts" since last election day, Mr. Gouin said, the 35-year-old rebel Liberal.

"L'Action Libérale Nationale," he said, "is a party of principles, therefore today pits itself against the two old Tory and 'trustee' parties, that of the Hon. Mr. Godbout and Mr. Duplessis."

Supplementary Estimates

Largest Single Amounts Are For Public Works

Ottawa. — Hon. Charles Dunning, finance minister, tabled supplementary estimates for the year ending March 31, 1937, totaling \$11,000,000, of which the largest single amounts were for public works, and loans and advances to the national harbours board and harbor commissions.

There was a substantial addition to the appropriations for national development aviation, \$2,833,700 additional to be spent on public works, mainly for buildings in which all the provinces share except British Columbia.

One of the largest items in the public building appropriations is \$250,000 for a supreme court building in Ottawa, a long-mooted project.

Militia services get an additional \$1,022,438, and the air force, coupled with civil government air operations and civil aviation, \$1,088,115.

Agriculture will get an additional \$1,180,000 of which the largest item is \$750,000 for administration of the health of animals branch, administration of Contagious Diseases Act, and Canned Foods Act. For marketing of agricultural products an additional \$350,000 will be appropriated.

For losses sustained by the British government under the 1926 British family immigration agreement of 1934, the estimates provide for \$74,000.

An echo of the 1935 rise in foreign arising from the activities of relief camp strikers, appeared in the estimates in the form of an appropriation of \$2,370 for legal fees arising from the inquiry commission which recently completed its work in the Saskatchewan capital.

Many Took Up Insurance

Lloyd's Offered Odds Against Change In Coronation Place

London.—Lloyd's Insurance Corporation offered odds of 10 to 1 against any change in place for the coronation of the King next year.

Brokers from the corporation offered these odds to sovereign manufacturers against the chance the King will marry prior to the coronation ceremony or she event will be postponed.

They said a land-office business insuring pottery and other knick-knack items are being turned out thousands of coronation souvenirs.

His Majesty married, for example, the mugs, plaques and other trinkets specially made for the coronation would require two portraits instead of one.

New Canadian Airport

Pelawau, Ont. — A new airport was opened at the Canadian military camp northwest of Ottawa after official ceremonies honoring pioneer Canadian flyers. The field was named the "Silver Dart" after the aeroplane used by J. A. D. McCurdy in 1909 at Baddeck, N.S., when he accomplished the first flight in a heavier-than-air machine in the British Empire.

Speaking in French, the premier promised his government would take steps necessary to put an end to direct relief and establish a plan under which work would be exchanged for reasonable wages.

The coming election campaign will be a three-party fight.

Paul Gouin, leader of the insurgent group, L'Action Libérale Nationale, announced his party would enter the campaign free from the agreement it made with the Conservative party in the election of last November when they united for the express purpose of defeating the Liberal regime of Louis A. Taschereau, in power for the last 16 years.

Repudiation of the agreement between the two parties had been brought about by a "series of acts" since last election day, Mr. Gouin said, the 35-year-old rebel Liberal.

"L'Action Libérale Nationale," he said, "is a party of principles, therefore today pits itself against the two old Tory and 'trustee' parties, that of the Hon. Mr. Godbout and Mr. Duplessis."

The Right Hon. W. G. A. Cramb-Gore, formerly First Commissioner of Works in the British Government, leaving the Colonial Office after being appointed Secretary of State for the Colonies to succeed to J. H. Thomas, who resigned.

QUEBEC PREMIER

When Premier Taschereau of Quebec resigned after announcing that a new Provincial Union would take place in August, the Hon. Joseph Adrien Godbout (over) was named Prime Minister of the Province. Mr. Godbout was Minister of Agriculture in the Taschereau Administration.

When Premier Taschereau of Quebec resigned after announcing that a new Provincial Union would take place in August, the Hon. Joseph Adrien Godbout (over) was named Prime Minister of the Province. Mr. Godbout was Minister of Agriculture in the Taschereau Administration.

Hopper Infestation

Mid-Western United States Threatened With Worst Plague Since 1931

Omaha, Neb., Aug. 10. — The worst hopper infestation since the "plague" of 1931 and 32 threatens mid-western United States crops, an agricultural survey disclosed.

With newly-batched "hoppers" already swarming over grain fields in sections of Iowa, Nebraska, Kansas, Oklahoma, Missouri and Montana, spotted infestations were reported also in parts of Illinois, Wisconsin and Colorado.

Recalling the devastation to corn and small grain by the insect hordes four years ago, H. C. Ashberg, assistant Iowa secretary of agriculture, asked that state's congressmen to join other mid-western legislators in demanding a \$2,500,000 federal appropriation.

As yet no government funds have been used over a two-year period to protect farmers with poison bait machines spread over the fields to kill the pests.

In other infested areas the threat was equally serious. O. B. Bare, University of Nebraska entomologist, predicted Nebraska was in for a disastrous season unless control measures were quickly adopted. He added that "hoppers were reported 'by the millions' over the state."

Fragment Of Plane

To Be Presented To Germany By Canada's Olympic Team

Toronto. — A fragment of the plane in which Baron Manfred von Richthofen, German flying ace, was brought down in France by a Canadian. Hoy Brown, will be presented to Germany this summer by Canada's Olympic team. Captain W. R. "Wop" May, Edmonton flyer, whose plane was saved when Brown killed the German ace, is donating the fragment. Richthofen was chasing May's crippled ship when Brown came to May's assistance.

Railway Measure Is Adopted By The Senate On Division

Ottawa.—After Mr. Hon. Arthur Meighen, Conservative leader and several of his associates in the senate had declared their intention of voting against return of the directorate system of Canadian National Railways administration, the bill for that purpose was adopted without a recorded vote.

"On division," Senator Meighen declared when Mr. Speaker put the motion for third reading, "The Conservative leader has launched a bitter attack against the bill and declared the action contemplated would put the railways in a position to serve 'the political necessities' of the government. He quoted Railway Minister C. D. Howe, who sponsored the bill in the House of Commons, as having declared the trustee board 'has within its power to destroy my political career.'"

"But within a week he decides the Duff-Phillips-Ashfield report, prepared after many months of study and inquiry by men of business rank and responsibility is to be thrown into the waste-basket and forgotten. He finds that more to the results of whose work he has never inquired, have to be thrown on to the ash-pit and abandoned."

The minister of railways found the railway system must be returned to direct government control instead of parliamentary control provided in the 1933 legislation; "That all the vulnerability to politics and adverse influences be removed."

"May I ask what purpose was it not central that the government should not ask Senator Meighen. 'I do not have to answer Mr. Howe has answered. Mr. Howe said: 'I am not a bit afraid of this boggy of parliamentary interference with the railways. What I am afraid of is the road's interference with the government.'"

Senator H. B. Homer (Saskatchewan), Wm. A. Griesbach (Edmonton), Arthur S. (Rignault), and Senator Suberland (Oxford), all Conservative appointees, opposed the bill and the latter declared he would vote again in this chamber.

Senator Harold Drummond, government leader, was the only speaker to support the measure. He declared the board of trustees, which is to be replaced by a board of seven directors, had failed to accomplish the task for which it had been appointed. The task was to restore equilibrium to the Canadian National system through co-operation with the Canadian Pacific.

Effect of the legislation will be to remove the three trustees and replace them by a board of seven directors, leaving the operation of the road in the hands of President E. J. Hufferd as at present. The trustees are former Judge C. P. Fullerton, Mr. F. Morrow and J. S. LaBelle. Mr. Fullerton was asked to resign as soon as the government took office last October but refused to do so.

Senator Dandurand told the senate that Mr. Morrow and Mr. LaBelle were prepared to resign at once. The board was appointed in 1933 and passed away January 1, 1934.

Senator Meighen declared the government had no mandate to change the board of trustees for the directorate provided in the new legislation. He asserted the government was taking the Duff report on railways, leaving it up and tossing it into the waste basket.

"Why this change?" queried the Conservative leader. "The result of an hour's address in which he traced the history of the government-owned system down to the present."

pointment of the board of trustees and asserted that body had proven its value.

"I scarcely know personally the new minister of railways. He has never been in parliament until after the election. I know his reputation as an engineer is good. I have not the least reason to doubt that as a businessman his reputation is good. I do not approach him predisposed adversely."

"But within a week he decides the Duff-Phillips-Ashfield report, prepared after many months of study and inquiry by men of business rank and responsibility is to be thrown into the waste-basket and forgotten. He finds that more to the results of whose work he has never inquired, have to be thrown on to the ash-pit and abandoned."

The minister of railways found the railway system must be returned to direct government control instead of parliamentary control provided in the 1933 legislation; "That all the vulnerability to politics and adverse influences be removed."

"May I ask what purpose was it not central that the government should not ask Senator Meighen. 'I do not have to answer Mr. Howe has answered. "Why this change?" queried the Conservative leader. "The result of an hour's address in which he traced the history of the government-owned system down to the present."

Stir Up Trouble

Outside Mosby Blamed For Trouble In Palestine

London. — The House of Commons received official indication that outside money is involved in the present trouble between Arabs and Jews in Palestine.

The Marquess of Hartington, parliamentary under-secretary for dominion speaking for William G. A. Osmelley-Croft, colonial secretary, said:

"The secretary of state thinks there is little doubt that before and during the disturbances, money from outside sources was distributed in Palestine. He has no information as to the exact measure."

A question by a member as to whether there was any Canadian money came from Rome went unanswered.

To Avail New Session

Ottawa.—Amendments to the British North America Act to provide for the amendment of the constitution by amendment of the constitution will be introduced by the government.

The Marquess of Hartington, parliamentary under-secretary for dominion speaking for William G. A. Osmelley-Croft, colonial secretary, said:

"The secretary of state thinks there is little doubt that before and during the disturbances, money from outside sources was distributed in Palestine. He has no information as to the exact measure."

Canada Supports Movement To Lift Sanctions Against Italy

Ottawa.—Canada lined up with the United Kingdom in supporting the movement to lift economic sanctions against Italy. Premier Mackenzie King announced in the House of Commons Canadian delegates to the approaching meeting of the league would be instructed to press for sanction lifting.

The prime minister said his statement a few hours after Anthony Eden, Britain's foreign minister, told the United Kingdom parliament the British government would lead the movement to lift sanctions. He made it plain, however, the Canadian government came to its decision "independently of the British viewpoint, several days ago."

At the same time, Mr. King said, Canada would continue to support the League of Nations in its efforts to promote collective security and peace, and would be fully to disorganize it.

Canada would not work alone through the league to promote peace and understanding, Mr. King said. When circumstances permitted, negotiations would be extended to include all empire countries.

It would be dangerous and futile to continue sanctions against Italy now that Ethiopia has been conquered and Italy's Senate put to

right, the prime minister said. It was the government's view there was no alternative to raising the economic bars against trade with Italy.

Mr. King said he could not entirely agree with the government's attitude although he said his mind was not made up entirely.

There was a different viewpoint to sanctions which had been expressed by Premier Hertzog of South Africa, Mr. Bennett said, and as far as he could find, no lack of logic in it. It was that by lifting sanctions "we undoubtedly put a direct premium on the violation of international agreements. There is no escape from that."

Abolition of sanctions, continued Mr. Bennett, meant that Italy, after subduing Ethiopia, with her army, would be free to break back into the world to see for Canada, a new country, a young democracy, to tell the world it did not sanction the breaking of solemn treaties.

"Why," asked Mr. Bennett, "because of relaxation of sanctions, 'should we take that action simply because someone else does?' It might be wise for Canada to stand as an example of rectitude to the rest of the world."

Snap

THIS is the great outdoor season and that means the great snapshot season. All over Western Canada cameras are busy clicking away, recording occasions of work and play that take place in these long summer days.

Naturally when you take a picture you take it for the purpose of preserving a memory. It is important, then, that whoever prints that picture for you prints it in such a manner as to give the most lasting and permanent impression that it is possible for you to get.

In a case like this, it pays to pay for the best. These snapshot records are important to you. Send your films, then, to EATON'S for printing. Here, expert workmen working with the finest of material, in workrooms boasting the most modern equipment, all combine to give prints that are clear, clean-cut and, above all, permanent—all at prices that are really low when you compare the quality of work turned out.

EATON'S

SAVAGE WATER

Bleaching Fluid A Great Wash Day Help

Removes tea, coffee and other stains from white cotton and linen and bleaches yellow cotton beautifully white in 20 minutes without boiling the clothes.

Experiments Are Helpful

Canadian Research Institute in Court
Of Appeal In Laundry Matters
In the last year 500 disputes over damaged laundry have been settled by the Canadian Research Institute of Launderers and Cleaners in the National Research Council Laboratories in Ottawa.

In its first annual report the Institute, founded a year ago to act as court of appeal in laundry and cleaning matters, said out of the 500 reported articles, mostly linen, 70 per cent were damaged outside the laundry, usually in the home and frequently by misuse of household bleach; 20 per cent of the damage was due to faults in manufacture; and 10 per cent was actually to blame on the laundry or cleaner.

The Canadian Institute of Launderers and Cleaners was founded to carry out helpful experimentation in the Research Laboratories on efficient methods of washing and cleaning and to obtain technical information of benefit to the laundry and cleaner. It is sustained by forty members from coast to coast, undertakes specific service and gives unbiased scientific opinion on damaged claims.

With microscope, photography, and other such aids, the reason for designation of textile shrinkage and loss of color in prints, holes and tears are ferreted out.

Sunlight concentrated for a period of five days on rayon curtains, for instance, that does not appear until the curtains are being washed. Threads of serge pulled too tightly when the linen is woven were discovered to be the cause of frayed edges and holes that come when even the better grades of linen are dried after being washed for the first time.

One of the most difficult problems solved by the Institute last year was the reason for a number of small irregular holes in the centre of a fine linen table cloth. The cause, it was found, the material had been damaged by acid created when the heat of the room caused the acid to collect on the outside of a silver fern vase having traces of an acid silver polish on its surface.

The water absorbed some of the silver polish left on the bowl, then dropped on the table cloth. The owner had placed a damage claim against the laundry as the holes did not appear until after the cloth had been washed.

Decades are the cause of much damage and, with household bleach, are indirectly the reason for many damage claims, the Institute experts state.
Regarding home laundry, the Institute stresses the use of bleach only in the way recommended by the manufacturers and also warns housewives to pay strict attention to mechanical action of washers and mangle machines to avoid overloading.

How To Attain Success

Live Within Your Income And Save
Portion Of It

The young or middle-aged man who has his fling usually does so with money which does not belong to him just as truly as the scheming tradesman runs away with funds which do not belong to him.

A sage trite saying is: "It's not what you learn but what you remember that makes you wise, and it's not what you earn but what you save that makes you independent." The average man would like to be successful in a financial way. He sees independent people and would like to copy them. He asks: "How may I become a success?"

James J. Hill, the famous Canadian who went to the United States and built the Great Northern railroad, answers this question for us. He says: "Are you able to live within your income, and save a portion of it, no matter how small? If you cannot do this, the chances of success are not within you."

The Town Of Yawn

My friend, have you heard of the town of Yawn?
On the banks of the River Snore, Where blooms the well-to-do white flower fair.

And the soft grasses grow green. It dwells in the Valley of Whistle-Ups.

In the Province of Let-It-Slide. That life feeding is idle there, It's the home of the listless "I don't care."

Where "Put-It-Over" abides.

San Francisco has the largest Chinese population of any United States city—with only 26,000, at that. And Los Angeles leads all cities of Japanese with slightly more than 20,000.

FAMOUS CANADIAN STATESMAN CELEBRATES EIGHTY-SECOND BIRTHDAY

On the twenty-sixth of June, Sir Robert Borden, Canada's war-time Prime Minister, celebrated his 82nd birthday. Having returned to the House of Commons after he ceased to be a Commander, Sir Robert has visited the scene of his former Parliamentary triumphs but seldom since he resigned as head of the Government of Canada sixteen years ago. However, he has never ceased to serve his native land and for years has worked tirelessly promoting world peace. The interesting pictures depict some of the highlights in Sir Robert's distinguished career. At the right we see him during the strenuous years of his Premiership as he frequently walked up Parliament Hill, Ottawa. At the left is a picture of Sir Robert in his Windsor uniform when he was in London visiting meetings at St. James's Palace, Bolton, in a picture of the war-time Prime Minister when he visited Canadian troops in training in England; while at the top is a recent portrait of Sir Robert.

Cruelty To Poultry

Depriving Birds Of Exercise And Fresh Air Is Discouraged

The confinement of domestic birds in small pens where they are deprived of exercise and fresh air is denounced in an editorial in *Our Dumb Animals*, which reads, in part as follows: Raising poultry in glass jars is a refinement of cruelty that no man worthy of respect would indulge in. Pictures of this practice have appeared in many papers, and these pictures have even been reproduced in Europe. One man has had himself photographed with young hens confined in glass containers. Several humane societies have given notice that any such practice will be subjected to prosecution. We are wholly opposed to the all-too-prevailing methods of many poultrymen in shutting hens up for long periods in such narrow quarters that all exercise is impossible. Of course, the purpose of this is to turn the poor creatures into egg-laying machines with no thought for their comfort or pleasure. Such methods are contrary to nature.

Will Occupy Old Rooms

Suite In Marlborough House Being Redeclared For Queen Mary

When the Queen returns to Marlborough House she will occupy the suite of rooms which she used when she first lived there, says the *London Daily Telegraph*. It is being redecorated for her. The layers of paint have been stripped from woodwork and walls and both are being painted cream. This is in the Queen's view, the perfect background and she invariably chooses it. Handsome mahogany doors are a feature of the rooms at Marlborough House. No structural alterations of any kind are being made. The Queen's suite is on the first floor overlooking the Mall. The three ground-floor reception rooms lead into the gardens. The Red Drawingroom and the saloon are still furnished as they were in Queen Alexandra's day and will not be altered.

Building Not Endangered

But Tide Of Silver Thawing Lifts Tower Of London

The 1,000-year-old tower of London bobs up and down with every tide of the River Thames that sweeps past its grimy walls, says the *National Physical Laboratory*.

Tide gauge that with every tide the historic building lifts itself three-tenths of an inch. And it is assumed the movement has been going on ever since the first stone was laid under the direction of William the Conqueror in 1066.

The whole building, also, is creaking in like a giant creaking at the rate of about four-hundredths of an inch a year.
A subbed of gravel accounts for the gradual slipping, but an official stated it is unlikely that the tower ever will be endangered.

Good At Fancy Work

Chicago Postman Has Just Finished Crocheting A Bedspread

Julian De Parpe, a postman who delivers letters on Michigan avenue in Chicago, has no crocheting to carry to work with him. The fancy bedspread on which he had labored 23 years was finished. For years De Parpe took pieces of the spread with him to work, and his needles flashed in his moments. At first, as a substitute postman, he made rapid progress. When he was added to the regular force, he had less time.

"The fault with most after-dinner speakers, we read, is that they refuse to speak up. The trouble with others is that they refuse to dry up."

Feet of women in England are growing larger, due to slippers.

Not Always A Success

Animals, Birds And Insects Sometimes Make Bad Immigrants

Port Huron, Ont., has just received word that a shipment of one hundred muskrats from that place has reached northern Finland safely.

The department of agriculture of Finland imported these rats, presumably to inaugurate a fur farm. It may be presumed that the animals will fulfill the purpose intended, for it is said that Canadian muskrats are the hardest and best of their animals of their kind in the world.

It has been learned, however, that transatlantic animals, birds, or insects from their natural climate and environment to a different locality sometimes is attended by disastrous consequences. Often, they develop destructive qualities. That peculiar tendency in nature has been demonstrated sufficiently to suggest extreme caution in such experiments.

Comparatively harmless English hares introduced to Australia developed to an extraordinary size and became a scourge with regard to agricultural crops. Similar results attended the importation of the English rabbit to Canada. A few years ago Canadian muskrats brought to England increased tremendously in numbers and their burrowing produced the destruction of many embankments and other protective works on river banks and at wharves.

Various flies and beetles having been inadvertently carried to this continent from the Old World developed to such a degree as to become a destructive kind. The corn borer, the Japanese beetle, the elm beetle and the spruce sawfly have all caused serious damage. Other destructive scourges attest the danger of transferring animals, birds or insects from their natural environment. It has cost the continent many millions of dollars because of innocent but injudicious interference in the natural life—resulting in some forms of life—resulting in Canada's Overthrow.

Philosophy Of Life

Miss Agnes Macphail Gives Her Four-Point Doctrine

Agnes Macphail (U.F.O.-Lab. Grey-Herons), first woman member of the House of Commons and a member for 12 years, gave her four-point philosophy of life:

"1. Cut not non-essentials. Don't do things which are no use to you and give neither help nor joy to others. Don't belong to clubs that serve no value or anybody and waste time and energy and make you less effective by blurring your vision."

"2. Be natural. Polish the natural but do not distort it. All great souls are natural and simple."

"3. Do not rely completely on any other human being, however dear. We meet all life's greatest tests alone."

"4. Live in the present. Yesterday is gone, tomorrow has not arrived, live today. Don't live for today only but in today."

Speaking to the graduating class of Ottawa Ladies' College at a private dinner, Miss Macphail said: "Life is a great teacher, but slowly do we learn. Life is nearly over before we have found out how to live. This is the best argument I know of the need of a world beyond."

Keen Competition

"The story goes that two Liverpool butchers were competitors. 'Sausages, one shilling the pound,' was over the door of the other shop the first shop.

"Sausages, ten pence the pound," was over the door of the other shop the second day.

"Sausages under one shilling cannot be guaranteed" was the counter of shop number one.

"We furnish sausages for the king" was the next announcement of shop number two.

Shop number one, not to be outdone by such methods, and to settle the argument, put the following sign the next morning: "God save the King."

Preventive Medicine

Dr. R. H. Inhofe physician to the Dismal, quipped, referred to his healthy physique as an example of the benefits of preventive medicine. Excellent results had been obtained from the administration of diptheria toxoid to the five little sisters, the doctor said.

"I can assure you that a good woman's thoughts rise above those of a man's," said Dr. Inhofe.

"That's right. She's probably thinking of a new hat."

Saskatchewan is the world's greatest wheat-growing area.

Magpie Menace

Saskatchewan Stock Growers Ask For Government Assistance

Saskatchewan Stock Growers' Association will increase their efforts for government help in destroying a magpie menace "greater than the wolf menace ever was," stockmen decided in convention at Moose Jaw.

While no figures of actual damage done to cattle heads in the province by the magpie were available, weathermen ranchers told almost incredible stories of the attacks of the feathered buster on herds killed in bush country during winter months. Cattle with eyes pecked out, with noses and gaping wounds where the birds had eaten their way through hides and flesh; a horse with a hole as large as a man's fist eaten in his leg—these were some of the results of the magpie menace during the winter period.

Ranchers of the Cypress Hills district and areas where cattle were driven into bluffs instead of housed during cold weather estimated that a good proportion of their winter losses were due to the magpie.

A resolution passed last year asking that a bounty of 10 cents per head and 10 cents per egg for magpies be set by the provincial government was placed in hands of the resolutions committee for redrafting.

The magpie, as well as the crow, was given fair trial during discussion. Each was charged with rabbit plagues and gopher plagues, and the wolf menace, after the law was passed, was wiped out because of bounty, asked what would succeed the magpie?—wondered if the pestiferous bird had so use as all—and at last it was decided no reward would be allowed to remain.

Discussion followed an address by W. O. Ross, K.C., M.A., who urged of government efforts to battle the crow and magpie menace by present hunting and shooting campaign.

Magpies were estimated to be banded, he estimated. Prices ranging from \$500 to \$1,000 would be distributed as banded crows were shot and banded sent in to the department. Of the 600 birds banded, more than 100 were magpies although they were as scarce as crows. He urged ranchers living in districts where the magpie was plentiful to set traps and send in the live birds caught to Moose Jaw wild animal park for banding and release.

There were 50 times as many crows and magpies in the province today as five years ago, he said. Drought years, by leaving nests and eggs of other birds without cover, had made food and prey so available to the scavengers that they increased with alarming rapidity.

Complete control was also being held out to school children. Mr. Ross said. All country schools had been instructed and the students bringing in the greatest number of crow or magpie eggs was given a prize.

Ranchers were in favor of the trapping idea. They studied diagrams of the large "Australian" trap which trapped from 10 to 100 birds in one trap. First time a trap of this description was used at the wild animal park, Mr. Ross explained, some 84 birds were caught. Some farmers favored a straight bait system with a bounty high enough to make magpie-hunting profitable. This they said would secure quick extinction of the birds.

Just A Foolish Notion

Dr. Morris Fishbein Has No Use For Food Fads

Food fads are all foolish, said Dr. Morris Fishbein, editor of the *Journal of the American Medical Association*, in an address to the Detroit Teachers' Association.

Vegetarians were the particular butt of Dr. Fishbein's satire. He denounced the "vegetarian diet" with particular attention to the mixed vegetable salad and placed the plant-eating only food along with other queer and unscientific notions which have sprung up and died out in the past.

His contention, backed up by recital of the results of scientific experiments on a large scale, was that human body needs both animal and vegetable proteins and thrives better when it gets them.

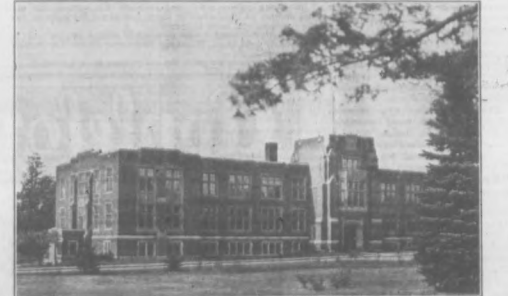

Some of the fads, past and present, expounded by Dr. Fishbein were "vegetarianism" (giving each taste of anything so much cheese before evaluating); Graham bread; whole wheat bread; coltsfoot; eating diet and losing diet; fish for brain food.

"That means fight when I come from?"

"Well, why don't you fight then?"

"Cause I ain't where I come from."

PRIME MINISTER OPENS NEW ADMINISTRATION BUILDING AT OTTAWA

The new administration building at the Central Experimental Farm at Ottawa which was opened by Premier W. L. Mackenzie King in June. This new building was named the William Saunders building, in honour of a man who contributed more to Canadian agriculture than any other man in the history of the Dominion. The chain of Dominion Experimental Farms and Stations across Canada is virtually a monument to the work he began 50 years ago, and the new building above stands upon the site of his former home.

Buckingham
FINE CUT

WORLD HAPPENINGS BRIEFLY TOLD

King Gustav of Sweden celebrated his 75th birthday recently.

Run-off from snow raised the level of Great Salt Lake in Utah 20 inches between November 35 and May 1.

The Evesham Painter, going back to the 12th century, was sold in London for \$12,000, to the British Museum.

The ancient office of high constable of Alaska, dating from the 16th century, has been revived in Wales after a lapse of many years.

It took the House of Commons 15 minutes to pass a bill through all final stages to establish a commission to assist finding jobs for returned soldiers.

France's general federation of labor announced its enrollment had reached 2,500,000 members—double the number enrolled before the recent strikes.

At the present rate of increase, 20,000 a year, it is estimated Yugoslavia will have a population of 20,000,000 in 1960. In 1931 the population was 13,934,038.

The tariff board announced it would continue inquiries into the motor car and petroleum industries. In accordance with announcements made in the House of Commons by Hon. C. A. Dunning, finance minister, in the course of debate on budget terms.

Work of a Bradford veteran, a small ivory cabinet has been designed for Woodstock veterans to carry to Vimy Ridge on the forthcoming pilgrimage. It will contain ashes from wooden crosses to be burned in a ceremony in Woodstock and these ashes will be scattered on Vimy Ridge.

To Assist Unemployed

National Council of Women Urges That More Attention Be Given To Question

Maximum working hours in industry and commerce should be so distributed as to allow at least one and a half days weekly rest, and that these intervals should be continuous wherever possible — the so-called English weekend — the National Council of Women urged.

The third annual convention also felt that in view of the widespread unemployment among "intellectual workers," national health and unemployment insurance schemes should be widened in their scope.

The two policy were contained in a resolution advocated by the international council of women, passed by the convention at Halifax.

Increasing difficulty was experienced by women over the age of 30 years, in obtaining or obtaining employment, another point of the same resolution said. It urged the establishment of loan funds and training schemes to enable such women to qualify themselves for entry into new occupations.

Immediate measures for the aid of the unemployed youth, just out of high school, and the other unemployed women were urged by the convenor of the standing committee on trades and professions. In her report, Miss Mrs. T. McKivver, of Winnipeg, suggested courses in which would be taught the rudiments of ethnology, history of civilization, hygiene, personal and social duties, and national and international civics, so helpful in that direction.

As convenor of the committee on natural resources and industry, Mrs. George Bell, of Regina, reported a moderate but steady improvement in Canadian industry.

She drew her conclusion from the reports presented her by councils in 19 cities and towns from Halifax to Vancouver.

Winnipeg Island, Eastern Siberia, has just bought the first motor-cycle ever seen there.

If you want to play a dictator you must keep the people staying mad as somebody.

Herrings require 12 hours curing before they are "kippered."

Pioneer Bird Ardent

Jack Miner Bands Over Twelve Hundred Canada Geese This Spring. It is a well-known fact that Jack Miner is a pioneer in tagging birds on this continent. He tagged his first duck in August, 1909, at Kingsville, Ontario. That duck was reported killed in January, 1910, in South Carolina.

He had to invent nets and contrivances to catch the various species he has tagged. That, in itself, was a task that demanded no little ingenuity and entailed no small expense.

To date he has tagged over fifteen thousand Canada geese. This past spring he has tagged seven or eight flocks, which totalled over twelve hundred in number.

These tags furnish invaluable information to the scientists, naturalists and game protective departments concerned in the study of the life, habits and migration routes of our birds. The authentic data so secured is used not only in the universities of the continent, but also by federal, state and provincial governments in both Canada and the United States. Much recent demerit clearly where the largest percentages of migratory wildfowl are found.

Each tag put on bears Jack Miner's name, post office address and the date, with in one corner is also stamped a selected verse of Scripture, this being Jack Miner's unique way of passing along God's word to the people who touch this coveted game bird.

Each of the twelve hundred tags put on this spring carried such a Scripture message, so that Jack Miner calls them his "winged missionaries."

Wheat Control Abandoned

Spain Is First To Part With Europe's Policy On Protecting Wheat Growers

The first important breach in Europe's policy of protecting domestic wheat producers by elaborate governmental methods can be attributed to Spain. The government of that country has given up prices providing for fixed prices, controlled sales and segregation of surplus stocks.

The twenty years the Spanish government has exercised control over the wheat industry in Spain and of late years these measures have had indubitable variety. The objective has been to increase returns to producers while maintaining low prices of bread. The only regulation now in force compels mills to keep on hand one month's supply of flour.

The government now has on hand about 14,000,000 bushels out of a surplus of about 22,000,000 bushels which was purchased to prevent disruption of the market last year. The government claims that the farmers have extended wheat sowing to unsuitable land, thus bringing about the possibility of a continuous surplus. Wheat is a basic factor in the wealth of Spain, representing about 25 per cent. of the total value of all agricultural production.—The Budget.

Fewer Failures in Canada

Figures Showed Improvement Over Corresponding Period Last Year

A considerable improvement was shown in the number of commercial failures in the three months ended March 31, compared with the corresponding period of last year. Assignments in the three months totaled 356, with liabilities of \$4,453,636, and assets of \$3,079,735, compared with 361 assignments, with liabilities of \$3,654,568 and assets of \$2,594,562 in the corresponding period of last year.

Breakfast Most Important

Everyone should eat an adequate breakfast. If one meal must be omitted, let it be lunch; but let your breakfast be hearty and substantial enough to keep you going through the morning.

Delicious as they are made, pollen grains become fossilized so perfectly that botanists can study the structure of pollens thousands of years old.

Sailing To Southern Seas

Romantic Story Behind Proposed Trip Of Young Adventurers

"Voyage to South Seas in sail. Behnauer leaving August for about a year. Six young men wanted to crew; each contribute \$500 toward expenses."

Behind this advertisement in a London newspaper is a story that would have inspired the romantic imagination of Joseph Conrad.

It began 15 years ago when two children met at school. The other day they were married. Now they plan to sail away with an older adventurer and two friends for 50,000 miles. Like all true adventurers they are going into the unknown, but with the knowledge that they cannot go so far without finding more interesting life than by staying in one town.

The bridegroom when interviewed said: "I am negotiating for the purchase of a 150-ton schooner. This will be paid for out of my own pocket. I shall be master. Lars Paersch, a Finn, with whom I have served in sail, will come as first mate."

"My wife's brother, George, will be a member of the crew. My wife will supervise the cooking and the cleaning and generally do the purchaser's work, as well as taking a turn at the wheel and other ship's duties. She is filled with quiet enthusiasm. She has complete faith in the future."

"We must require six young men between the ages of 18 and 30," the bridegroom added. "They must be good miners and prepared to pay \$500 each towards the cost in return for food, accommodation and the experience."

Old Roman Coins Found

Workmen in Dorchester, England, Have Across Twenty Thousand

Special police force was placed on the Dorset Museum, where 20,000 Roman coins discovered by excavating workmen in Dorchester, England, were taken.

Dug out by men working on the foundations of a chain store, the hoard is now found to have been one of the largest ever discovered in Great Britain.

Police took the coins from the spot where they were found, and none have been sent to the British Museum for experts to decide if they are treasure trove; if they are, the customary reward will have to be held on them.

So great was the crowd round the scene of the discovery that extra boardings were erected. Behind these the workmen were excavating carefully, and bit by bit the plan of a villa one inhabited by a wealthy resident of Roman Dorchester was unfolded.

The coins were in a beautiful bronze over nearly 38 in. high, and a bowl more than a foot across. Part of a wooden box containing further stores of wealth.

New Method Discovered

Muscles When Tensed Are Released Quickly For Short Spurts

Discovery of a method to "pump up" tired muscles, which for short spurts rest them more quickly than complete relaxation, has been announced in Rochester, N.Y.

When tired muscles are deliberately tensed the action appears to inject or squeeze into them a re-vitalizing chemical naturally produced in the body. There are three of these chemicals. The one believed responsible is adrenalin, the adrenal gland product which man manufactures, liberally when he fights.

The time for spread of the re-energizing is in a cut-up second, says the "pumping" method. The discovery reveals a hitherto scientifically unrecognized quick energy reserve.

The exhibit shows frog muscles "loaded." That is under alternate pull and release, which fatigues them. Complete relaxation overloads the fatigue in about ten seconds. But tensing a muscle rapidly restores its energy in about half a second.

A Cornell scientist reported similar results in his climbing work. After 30 successive chin-ups a short relaxation with arms outstretched left him with scarcely strength to resume climbing. But tensing for an equal period restored his muscles so that he went on easily and repeated the chin-ups more than 20 times.

The chestnut might be the most voracious and destructive disease of forest trees ever recorded.

WAKE UP YOUR LIVER BILE—

And You'll Jump Out of Bed in the Morning Ready to Go

The liver is the most important of all the organs of the body. It is the only one that can be diseased. It is the only one that can be cured. It is the only one that can be kept in good health. It is the only one that can be made to work better. It is the only one that can be made to live longer. It is the only one that can be made to be happy. It is the only one that can be made to be healthy. It is the only one that can be made to be strong. It is the only one that can be made to be wise. It is the only one that can be made to be brave. It is the only one that can be made to be kind. It is the only one that can be made to be gentle. It is the only one that can be made to be patient. It is the only one that can be made to be forgiving. It is the only one that can be made to be merciful. It is the only one that can be made to be loving. It is the only one that can be made to be kind. It is the only one that can be made to be gentle. It is the only one that can be made to be patient. It is the only one that can be made to be forgiving. It is the only one that can be made to be merciful. It is the only one that can be made to be loving. It is the only one that can be made to be kind. It is the only one that can be made to be gentle. It is the only one that can be made to be patient. It is the only one that can be made to be forgiving. It is the only one that can be made to be merciful. It is the only one that can be made to be loving. It is the only one that can be made to be kind. It is the only one that can be made to be gentle. It is the only one that can be made to be patient. It is the only one that can be made to be forgiving. It is the only one that can be made to be merciful. It is the only one that can be made to be loving. It is the only one that can be made to be kind. It is the only one that can be made to be gentle. It is the only one that can be made to be patient. It is the only one that can be made to be forgiving. It is the only one that can be made to be merciful. It is the only one that can be made to be loving. It is the only one that can be made to be kind. It is the only one that can be made to be gentle. It is the only one that can be made to be patient. It is the only one that can be made to be forgiving. It is the only one that can be made to be merciful. It is the only one that can be made to be loving. It is the only one that can be made to be kind. It is the only one that can be made to be gentle. It is the only one that can be made to be patient. It is the only one that can be made to be forgiving. It is the only one that can be made to be merciful. It is the only one that can be made to be loving. It is the only one that can be made to be kind. It is the only one that can be made to be gentle. It is the only one that can be made to be patient. It is the only one that can be made to be forgiving. It is the only one that can be made to be merciful. It is the only one that can be made to be loving. It is the only one that can be made to be kind. It is the only one that can be made to be gentle. It is the only one that can be made to be patient. It is the only one that can be made to be forgiving. It is the only one that can be made to be merciful. It is the only one that can be made to be loving. It is the only one that can be made to be kind. It is the only one that can be made to be gentle. It is the only one that can be made to be patient. It is the only one that can be made to be forgiving. It is the only one that can be made to be merciful. It is the only one that can be made to be loving. It is the only one that can be made to be kind. It is the only one that can be made to be gentle. It is the only one that can be made to be patient. It is the only one that can be made to be forgiving. It is the only one that can be made to be merciful. It is the only one that can be made to be loving. It is the only one that can be made to be kind. It is the only one that can be made to be gentle. It is the only one that can be made to be patient. It is the only one that can be made to be forgiving. It is the only one that can be made to be merciful. It is the only one that can be made to be loving. It is the only one that can be made to be kind. It is the only one that can be made to be gentle. It is the only one that can be made to be patient. It is the only one that can be made to be forgiving. It is the only one that can be made to be merciful. It is the only one that can be made to be loving. It is the only one that can be made to be kind. It is the only one that can be made to be gentle. It is the only one that can be made to be patient. It is the only one that can be made to be forgiving. It is the only one that can be made to be merciful. It is the only one that can be made to be loving. It is the only one that can be made to be kind. It is the only one that can be made to be gentle. It is the only one that can be made to be patient. It is the only one that can be made to be forgiving. It is the only one that can be made to be merciful. It is the only one that can be made to be loving. It is the only one that can be made to be kind. It is the only one that can be made to be gentle. It is the only one that can be made to be patient. It is the only one that can be made to be forgiving. It is the only one that can be made to be merciful. It is the only one that can be made to be loving. It is the only one that can be made to be kind. It is the only one that can be made to be gentle. It is the only one that can be made to be patient. It is the only one that can be made to be forgiving. It is the only one that can be made to be merciful. It is the only one that can be made to be loving. It is the only one that can be made to be kind. It is the only one that can be made to be gentle. It is the only one that can be made to be patient. It is the only one that can be made to be forgiving. It is the only one that can be made to be merciful. It is the only one that can be made to be loving. It is the only one that can be made to be kind. It is the only one that can be made to be gentle. It is the only one that can be made to be patient. It is the only one that can be made to be forgiving. It is the only one that can be made to be merciful. It is the only one that can be made to be loving. It is the only one that can be made to be kind. It is the only one that can be made to be gentle. It is the only one that can be made to be patient. It is the only one that can be made to be forgiving. It is the only one that can be made to be merciful. It is the only one that can be made to be loving. It is the only one that can be made to be kind. It is the only one that can be made to be gentle. It is the only one that can be made to be patient. Genuine Reductions on Quality Merchandise

This is your Opportunity to Save "It Pays to Pay Cash at Oliver's"

20% Off For Cash

This is a Summer Sale of Men's Clothing, Furnishings and Shoes, at a Saving of 20 per cent. Off the Marked Price, For Cash.

One of the many reasons why this SALE figure so prominently with men who are smart dressers, is because it has built up through the years of successful experience in the art of selling Good Merchandise. What we are trying to point, is that we are not only seeking to give the Highest in Quality at the very substantial saving of 20% Off, but also the Newest in Style; a concrete example why men look forward to this Unusual Event. A Few Nationally advertised lines excepted.

ALL OUR ADVERTISERS SAY SO

Without Fear Or Favor...

"I WILL hew to the line of right, let the chips fly where they may." It takes a stout heart to adopt this principle of General Grant's, yet it is the everyday matter-of-course attitude of a good newspaper. No matter whose head rolls in the dust, the truth must be told. No matter what storms of protest and vituperation it brings about its ears, your newspaper prints the news as and where it is found, faithfully and accurately. No malpractice to the public injury is hidden or condoned; no improper policy goes unchallenged. Because the newspaper is the forum and the voice of public opinion. It is the moving picture of daily life where all may see and all may judge freely and independently.

"THE truth, the whole truth and nothing but the truth." As conscientiously as though it were under oath your newspaper gives the plain unvarnished facts. Disagree with its editorials if you will—you have a right to your own opinions—but in the news columns you will find only the news, candid and impartial, on which to base your own judgments.

PRESERVE THE INTEREST AND THE VOICE YOU HAVE IN AFFAIRS BY YOUR OWN GOVERNMENT BY READING, AND, AT WILL, USING THE FREE IMPARTIAL COLUMNS OF YOUR NEWSPAPER.
